

KDN.S11003CS0

Radial contact ball bearings with seals or shields are designed to accommodate radial loads and some axial loads in either direction. One bearing series is based on a single cross section which remains constant as the bore diameter increases, leading to significant space and weight savings. The bearings are not recommended for applications having continuous rotation.

- Accommodate radial and some axial loads in both directions
- Extremely thin cross section
- Lightweight
- Chemical and corrosion resistance
- Low friction
- High stiffness
- High running accuracy

Dimensions		
d	110 mm	Bore diameter
D	116 mm	Outside diameter
H	3 mm	Radial cross section
B	2.489 mm	Width
d ₁	≈ 112.2 mm	Shoulder diameter inner ring
D ₁	≈ 113.8 mm	Shoulder diameter outer ring/ inner diameter housing washer
	1.588 mm	Ball diameter
	0.25 mm	Maximum radius of shaft or housing fillet

Calculation data

Dynamic load rating, Kaydon, radial direction	C _k	894 N
Basic static load rating, radial direction	C ₀	1 295 N

Tolerances and clearances

GENERAL BEARING SPECIFICATIONS

- Tolerances, radial clearance and recommended fits: Class 1
